c) Up to 6 co-op credits (2 each of SC 295, 395, 495) may be used in this category. CHEM 494 may be used, but the total of CHEM 494 credits plus co-op credits must not exceed 8. A grade of C or better is required in all courses in this category.

Numbered superscripts refer to notes on pp. 3–5.

AREAS OF CONCENTRATION: Although there are no formal options within the chemistry major, courses can be selected according to areas of greatest interest. Recommended academic plans for specialization in analytical, physical, synthetic, and biological chemistry, as well as recommendations for transfer students, are provided on pp. 6–9.

d) Students may substitute 3 credits from one of the above knowledge domains for 3 credits in another domain, thereby substituting a 9-6-3 credit pattern for the default 6-6-6 pattern in these general education courses. Students may also substitute 3 credits in foreign/second language at the third or higher level for 3 credits in any one of these three categories, provided that this substitution will not lead to the complete elimination of any category. Contact the Undergraduate Office to adjust audit if either of these options is used.

GENERAL ELECTIVES (17 cr)^{e, 10}

e) Up to 3 co-op credits (1 each of SC 295, 395, and 495) may be used in this category. CHEM 294 (Chemical Research)⁵ may be used in this category, but CHEM 494 or 496 may not. See notes 10 (p. 5) for a list of other courses that may not be used in this category. A total of at least 125 credits is required.

UNITED STATES CULTURES AND INTERNATIONAL CULTURES

REQUIREMENT⁶: Students must complete 3 credits in US and 3 credits in IL. A course carrying both designations only satisfies 3 credits of this requirement.
